

THACH PHU DANG

Backend Engineer • PHP Engineer • Ecommerce Industry

(+84) 90 266 8291 | thachphudang@gmail.com | Ho Chi Minh City, Vietnam | www.linkedin.com/in/thachdang

PROFESSIONAL SUMMARY

Backend Engineer (5+ years) specializing in PHP, Shopware, and commercetools. Experienced in building scalable eCommerce systems, integrating third-party services, and delivering reliable releases with automated testing and CI/CD.

AREA OF EXPERTISE

TECHNICAL SKILLS	PHP • Symfony • Shopware 5/6, commercetools • JavaScript, TypeScript • Next.js • React, Vue.js • HTML • MySQL/MariaDB, RDBMS • GraphQL • PHPUnit, Jest, Cypress
PROFESSIONAL SKILLS	Problem solving • Clean code practices • Teamwork • Communication

PROFESSIONAL EXPERIENCE

SHOPMACHER eCommerce GmbH & Co. KG — *Backend Developer (5+ years)* Jan. 2021 - Jan. 2026

(For a detailed breakdown of core features and third-party integrations for these brands, please refer to the Engineering Case Studies appendix)

- ✓ Led backend development across 5+ eCommerce projects
- ✓ Built payments, catalog, and checkout features; customized core flows to match business rules
- ✓ Integrated third-party systems (payments, search, analytics) via APIs and SFTP pipelines
- ✓ Developed React/TypeScript components within existing design systems
- ✓ Ensured quality with automated tests (PHPUnit, Jest, Cypress) in CI/CD
- ✓ Collaborated on architecture and mentored 2 junior developers

Delivered solutions for 6+ brands across the DACH market:

Collonil • BabyOne • ter Hürne • Radwelt • S.E.A Distribution • Interquell • ANWR Schuhe • Mollie • BravoBike

EDUCATION

Advanced Diploma in Software Engineering <i>FPT Aptech, Ho Chi Minh City, Vietnam</i>	2020
Bachelor of Business Administration in Human Resource Management <i>HCMC University of Foreign Languages - Information Technology, Ho Chi Minh City, Vietnam</i>	2017

CERTIFICATIONS

Shopware 6 Certified Developer	2023
--------------------------------	------

APPENDIX I: ENGINEERING CASE STUDIES - Shopmacher GmbH

A technical deep-dive into decision-making, complex third-party integrations, and performance-driven eCommerce solutions.

Note: Technical details provided herein are limited to architectural patterns, public-facing features, and integrated technologies. No proprietary business data, or internal commercial metrics are disclosed.

Major Shopware 5 & 6 Development (2021 - 2025)

Core tech stack: PHP 7.4/8.x, Symfony 5/6, Smarty, Twig, Javascript, jQuery, ExtJS, Vue.js, Doctrine 2, MySQL, MariaDB, Docker, Orbstack, Jenkins, Creoline, CI/CD, PHPUnit, Cypress

Standardized Engineering Workflow

- **Data Architecture:** Engineered robust, cronjob-driven synchronization pipelines for complex entities including Products, Order, Multi-channel Pricing and Stock.
- **Storefront Logic:** Architected the underlying backend logic for advanced CMS elements, providing structured data for custom navigation, product listings, and dynamic category layouts.
- **Automated & Manual Quality Assurance:** Maintained high system stability through a multi-layered testing strategy:
 - **Backend Logic:** Developed PHPUnit suites to verify core business rules, data mapping.
 - **End-to-End (E2E):** Implemented Cypress tests to automate the verification of critical customer journeys, including the checkout and registration flows.
 - **Process:** Authored detailed manual testing protocols for complex, multi-stage features (e.g., rental bookings via forms and installment payments).
- **Technical SEO & Discoverability:** Implemented performance-focused SEO enhancements following specialized agency directives, including structured data (Schema.org), dynamic meta-tagging, and optimized URL routing to maximize search engine visibility.
- **Third-Party Ecosystem:** Successfully integrated and configured professional-grade plugins and APIs, including payment gateways (PayPal, Amazon Pay, EasyCredit), marketing tools (Google Tag Manager, Neocom).

Project-specific Innovations

Interquell (Shopware 6) - Pet Food (B2B/B2C) Outstanding Technical Features • Full-Scale Project Takeover & Optimization: Successfully orchestrated the technical handover of a complex, multi-stakeholder ecosystem from an internal team. Audited and stabilized the core Talon.one integration, resolving critical bugs in the dual-incentive logic to ensure the accurate distribution of customer loyalty points and veterinarian commissions.
ter Hürne (Shopware 6) - Flooring (B2B/B2C) Outstanding Technical Features • Asynchronous Data Processing: Implemented a custom synchronization layer using Symfony Messenger and Cronjobs to process fragmented CSV data for technical wood specifications, multi-channel B2B/B2C

pricing while ensuring server stability via background queue processing.

- **Geo-Integration:** Developed a highly customized Storefinder CMS element integrated with the Google Maps API, providing a seamless, localized dealer search driven by the synchronized backend data.

S.E.A Distribution (Shopware 6) - Audio (B2B)

Outstanding Technical Features

- **Multi-Unit Brand Architecture:** Implemented a complex, triple-unit theme system that dynamically switched layouts and Navigation Menus based on the business area. Engineered the Microsoft Dynamics 365 integration to route inquiries from these units into specific marketing campaigns, replacing the standard checkout with a high-touch lead-generation flow.
- **Vendor Collaboration:** Consulted for the external vendor on the Shopware Admin API and entity mapping to ensure seamless product data ingestion

Collonil (Shopware 5) - Leather care

Outstanding Technical Features

- **Technical Project Leadership:** Assumed full ownership of the legacy Shopware 5 environment. Led the technical execution in direct collaboration with the Project Owner and Tech Lead, providing architectural guidance and mentorship to a junior frontend developer to ensure stable feature delivery and schema extensions.

.....

Major Commercetools Development (2025)

Core tech stack: Javascript, Typescript, Commercetools, Next.js, React, GraphQL, Jest, Cypress

Standardized Engineering Workflow

- **Type-Safe SDK Implementation:** Leveraged TypeScript and the commercetools SDK to build a resilient integration layer, ensuring high-performance API interactions and robust error handling across the Headless ecosystem.
- **Multi-Layered Testing Strategy:** Maintained high system reliability by implementing Jest for unit testing business logic and Cypress for automated end-to-end testing of critical headless checkout flows.
- **Technical Documentation:** Authored comprehensive manual testing protocols to validate complex edge cases in multi-tenant environments, ensuring stable feature delivery across diverse merchant configurations.

Project-specific Innovations

ANWR Schuhe (Commercetools) - Footwear Retail

Outstanding Technical Features

- **Retail Media Tools Implementation:** Engineered the frontend integration between a React-based storefront and a specialized Retail Media Platform. Developed high-performance components to dynamically inject sponsored product listings and display ads, ensuring zero-latency impact on the core shopping experience.

Mollie & EasyCredit for BravoBike (Commercetools) - Payment Connector

Outstanding Technical Features

- **Multi-Tenant Architecture:** Engineered the connector to handle dynamic configurations, ensuring a seamless "plug-and-play" experience for global users while maintaining strict data isolation and security standards.
- **Event-Driven Payment Orchestration:** Collaborated with the Tech Lead to engineer a robust Mollie Payment Connector utilizing the commercetools Event Subscription mechanism. This decoupled architecture ensured reliable, asynchronous processing of payment flow without blocking the checkout lifecycle.

APPENDIX II: PROJECT PORTFOLIO INDEX

A consolidated directory of live enterprise platforms, marketplace integrations, and open-source engineering.
